

Dear Friends,

A little goes a long way, they say, especially when you do it for others. Our stories this week show just how long. A garden changes lives, and a little attention makes them measurably better. Any contribution in support of Bulgarian medics is a vote of confidence for their work and doubles their resolution to see us through this crisis.

So, if we all do our part, and give a little from ourselves by disinfecting, keeping a physical distance, and wearing a mask in public spaces, maybe we will beat this virus sooner.

Enjoy our stories, and stay healthy!

United We Support Bulgarian Medics

Thirty-five healthcare facilities received funding from the United against COVID-19 Response Fund. Nearly 325,000 levs was distributed among them for the purchase of personal protective supplies, disinfectant, medicine, and life-saving medical equipment.
