

Request for proposals: What will you do for your community?

The America for Bulgaria Foundation is seeking project ideas that will contribute to the economic development of local communities in the next ten years making them more attractive places to live and work. These ideas will offer solutions for education in an electronic environment, for transparency and accountability of local institutions, and for sustainable tourism that respects nature and Bulgaria's cultural and historical heritage, and will encourage future scientific discoveries.

Are you ready to actively contribute to the development of your communities? We are announcing ABF's new program *The Next 10: Supporting Ideas that Matter in the Next Ten Years*, with four RFPs worth 1 million levs.

FIELDS WE SUPPORT:

Good Governance at the Local Level

With this RFP, the America for Bulgaria Foundation will fund project proposals that increase accountability in the spending of public funds and increase transparency in the work of public institutions at the district or municipality level.

The aim is to strengthen good governance and create a favorable environment for private sector development.

Science with a Future

With this RFP, ABF will finance project proposals of young innovators in the fields of natural sciences, healthcare, agriculture, and veterinary medicine. The ideas must be application-oriented, focus on existing problems, and have the potential for implementation.

The main goal of the RFP is to encourage and stimulate the early stage of scientific developments and products.

Online Learning

With this RFP, ABF will fund project proposals that will contribute to finding, developing and testing interactive and adaptive methodologies for teaching in an electronic environment.

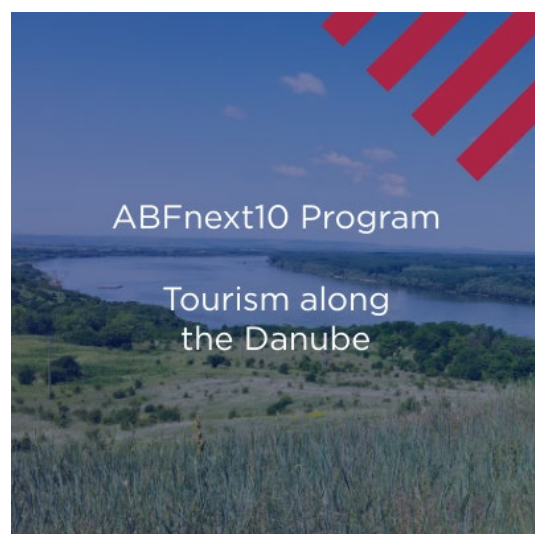

The focus of the RFP is school education.
